Hampshire & Isle Of Wight Published 1870

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the time of the original survey for England, Wales and Scotland in the 1840s. In 1924 the 1:10,560 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published data given therefore is often some years later than the original data. Before 1914, all maps were based on the Cassini Projection, with independent surveys of a single locality or group of localities, giving rise to significant inaccuracies in surveying. In the late 1840s, a Trigonometrical Survey was conducted, which updated the 1:10,560 mapping from a new set of data. The maps appear unaltered - with all military camps and other of strategic importance. These maps were actually compiled with the National Grid in 1933, as the 1:10,560 maps were produced using the Transverse Mercator Projection. The service process standard will comply, with no alterations appearing every 10 years or so for the urban area.

Sussex
Published 1879 - 1880
Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were produced in the 1840s. In 1840 the 1:2,500 scale was adopted for mapping areas as to these maps were used to update the 1:10,560 maps. The published data given therefore is often some years later than the original data. Before 1878, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant discrepancies in adjoining areas. In the late 1860s, a Provisional Edition was produced, which applied the 1:10,560 mapping from a number of sources. The map appears uncorrected with all military camps and other irregularities removed. These maps were initially surveyed with the Universal Grid. In 1870, the first 1:10,560 maps were produced using the Transverse Mercator Projection. The original maps were updated and reissued with new information every 10 years or so for urban areas.

Hampshire & Isle Of Wight
Published 1910

Source map scale - 1:10,560

The historical maps shown here were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1870s. In 1924 the 1:25,000 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published data gives therefore a better view of the area than the original data. Before 1924, all maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving the inaccuracy associated in carrying over. In the late 1840s, a Provisional Edition was produced, which updated the 1:10,560 mapping from a new set of sources. The maps appear undistorted - but all military camps and other strategic areas removed. These were some actually overlaid with the National Grid in 1950. Revised 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.
