Planning Application 18/01033
Persimmon Homes

We are dismayed to hear of the above planning application. Our objections are: (in no particular order)

- increased pollution, we are already choked with traffic with Wimblesbury School, Southleigh Road and the level crossing. With every new house, ^{comes} a potential of 2 more cars. Plus years of trucks and lorries rumbling up and down residential roads during the building process.
- We are concerned about the density of the houses and style not in keeping with existing properties
- Further loss of wildlife
- Safety concerns for pupils and elderly people through increased traffic and car parking
- loss of rural space, so important to all our well-being
- noise and light pollution
- lack of facilities such as GP surgeries.

We would be grateful if you could take these points into consideration when reviewing this planning application. We really should consider people's general + mental health, in such proposals.

Another point is brown sites, there are many in Havant that could be used. We realise that these are a more expensive alternative but should be considered and would generally 'tidy up' the area as well.

Thank you
