Planning No. APP/19/00075 Green Cottage, Langstone.

Dear Ms Ballam,

I would like to strongly oppose the proposed planning application for the heightening of the roof into a second floor structure, and pitched roof from the existing roof. I knew the former owner, [REDACTED] and the concerns which she had concerning that roof and the lintels, thinking they were not man enough for the job. With all the extra weight of the proposed application there would certainly be a far, far greater concern.

Another very real objection is that the house is a Grade II Listed Building within a Conservation Area, and within the Chichester Harbour Conservation Area. It is such a uniquely beautiful area of our country of which we should be proud and wish to keep it beautiful for all to appreciate. How can it even be debated over when such an application is suggested in a Conservation Area, both harbour and country, and on a Listed Building too? What do these things mean if anyone can add to or change their house, I thought the whole idea was that they maintain the uniqueness of an area which is beautiful. Surely there are enough houses being built around here to be able to preserve the areas of Outstanding Natural Beauty, for once they are gone they are gone forever.

Sincerely yours,

[REDACTED]
