

PURBROOK TYRES

38A LONDON ROAD
PURBROOK
WATERLOOVILLE
PO7 5LJ

Dear jacky /Penny

As requested in meeting with mrs clark I have a few photos enclosed as maybe requested .

1. A picture of the garage workstation
2. This data is of the brand new machine decibels when at working position .
3. This is 100mm celotex that we have put around the compressor to reduce the noise to minimum.
4. The readings on the compressor which will be used to power the machine .this compressor is a 200ltr so it can be run minimally to cut down noise .the decibel for this machine is 65db.
5. Exit of garage .
6. The noise in this garage is minimal as all new machines have a low db ratings .
7. All work taken off the car /wheels are done by a battery powered cordless hand gun which reduces the noise.
8. We also have a mobile tyre van service which takes away a lot of customers as more and more are having the service at there home or work.
9. We believe we are a vital business in the Purbrook/waterlooville local community .

Many thanks
Mike
