Proposed planning for 65 Southleigh Road, Havant. PO92QQ

Dear Sirs,

I write with reference to the above planning application to which I have **no** objection.

I do, however, have concerns regarding the safety of vehicles and pedestrians using Southleigh Road during the execution of the proposed work. Southleigh Road is a busy road especially during school hours. The added consideration of the railway crossing at Warblington often brings traffic to a standstill.

During the last two months tradesmen and contractors have been undertaking remedial works at this address with little or no consideration to the hazards they are creating on a daily basis, by parking on the road, public footpaths and neighbouring grass verges.

Understandably, when deliveries are made there has to be occasion when lorries are parked causing obstruction to traffic for short periods of time. However, on almost a daily basis during December and January there have been up to 5 cars and vans parked in a row, blocking the footpath, often for the duration of the day. After witnessing a near collision, because cars were trying to overtake this long obstruction, I politely advised a couple of tradesmen that they were obstructing the footpath and causing a real problem for the many disabled people that have a right to use the pavement, let alone a real hazard for vehicles using the road. This was met with total disinterest and then resulted in some of them parking on the grass verges on the opposite side of the road. This then created yet a further hazard and made it almost impossible for those residents living in the properties to safely leave their drives.

I would politely request that the Planning Department take appropriate consultation from the Highways Department to ensure that whilst these extensive works are undertaken, due consideration by contractors must be made about parking to maintain the safety of pedestrians and road users.

Thank you for your due consideration.
