6. Tree Preservation Order Details

If you know which TPO protects the tree(s), enter its title or number below.

I have had 3 tree surgeons to look at the many conifer tree's in my garden and I require consent for the work listed overleaf.

7. Identification Of Tree(s) And Description Of Works continued ...

There are 30 conifer trees in my garden that require reducing. I would like to fell 3 chamaecyparis conifers. 2 are near to the property and I would like to replace these with 2 small/medium size trees. 1 is in poor condition and would like to replace with small/medium size tree.

When these conifers were planted, there were many to cover the area along the boundary, but 36 years on these trees are tall, wide and dense for a small garden. These trees have the potential to grow to loft and are too large for the space. Beneath the trees the ground is very dry and covers a large area. The lawn has ground subsidence / big cracks.

I would like to add colour and variation into the garden with Deciduous + evergreen trees

Possible trees / shrubs

Sorbus Vilmerini

Sorbus St Joseph Rock more

Ulmus minor - Dampieri Autea

Holly Aquifolium nme Briot

Pittosporum crassifolium - Variegatum

Acer negundo Variegatum

Acer Platanoides Goldsworth - purple

Eucalyptus - e gunnii

It would be good to add color and variation,
but with trees and shrubs that would be
small / medium to give screening but to not
dwarf the garden. The sketch is not to scale.
