To: Haywood, Daphney Subject: PLANNING APP/18/00671

Dear Daphney,

With regard to the development of Arun Close I feel I have to comment on the lack of adequate car parking facilities for the following properties:

No 5 - 4 Bedroom House

No 7 - 3 Bedroom Bungalow

I am in full agreement with the comments raised by [REDACTED]

I further note the width of the road opposite the parking on 2 bedroom bungalows nos 1 & 2 is 5.1m and the depth of their parking spaces is 4.6 m

In comparison the width of the road opposite the parking on the three bedroom bungalow no.7 is 4.2m and the depth of their parking space is 4.1m

According to "Google" the length of the average British car is 4.8m which means the average British car would overhang by 0.7m into the road – this would be a total disaster as the road has been reduced in width by 0.9m at this point already.

This problem does need to be resolved to allow all parties adequate access to parking in relation to the size of the accommodation. If the proposed sale of the end of the road is sold to the occupants of no 6 this would restrict the parking possibilities even further.

I would urge you to consider the points raised by [REDACTED] and myself as a matter of urgency.

Your faithfully

[REDACTED]
