Our Ref: CRM.1112.009

Date: 26 April 2016

Dear David,

Request to Discharge Condition 5 (submission of an evaluation of the results of an approved scheme of investigation of archaeological site investigations) for Planning Consent APP/15/00303 for the Havant Health and Well-Being Complex, and Condition 6 (approved programme of assessment, specialist analysis and engagement)

In accordance with the requirements of **condition 5** of the above planning permission, archaeological site investigations have been undertaken in accordance with the Written Scheme of Investigation approved through the discharge of condition 4 of the planning consent. The attached report provides an evaluation of the investigations and concludes no further investigations are required.

As a courtesy, the report was sent to Hampshire County Council Archaeologist David Hopkins for his information. He has reviewed the report, agrees with its findings and is ready to confirm to you, upon formal consultation, that no further works are warranted.

In view of the lack of any finds and assessed condition of the site, in which it is considered that previous groundworks have destroyed any archaeological evidence, we also request a discharge of **condition 6**, also with reference to the attached report, which indicates no requirement for further assessment or specialist analysis and no benefit to be gained from public engagement in view of the findings.

A cheque for £97 is enclosed.

Yours Sincerely

Lee Searles
Director of Planning
