F.A.O. David Eaves

Dear Davdi

Further to my objection to the above application and our telephone conversation, I have attached a scan containing photographs of the Brent Geese on various days during the Christmas period. They have foraged on the farm for forty years to my knowledge.

I have also attached two photos of a beer lorry unloading at the rear of the new Hayling Billy Public House, which is directly opposite the proposed access point for the development. This illustrates one of the reasons why this access point is inappropriate.

I hope these are of assistance.

Kind regards

Michael Wilson
