Havant, PO92AX

Dear Sir or Madam

Re: APP/16/00774

I am writing to oppose the building of 192 dwellings to the north of Havant Road (A259) and west of Selanger Avenue. The incremental filling in of the gap between Havant and Emsworth by housing is to the detriment of both communities. It is important to the quality of life of all residents to have green spaces between towns and not continual developments.

In addition, there appears to have been little consideration of the proposed additional demands upon infrastructure, e.g. medical services, school places, traffic, congestion and flooding risks.

I understand the needs for additional housing, which preferably should be affordable, available for local residents and not on green field sites. However I would argue that the needs of Emsworth's current and future residents for green spaces take precedence over this development application and the profits of building firms.

Yours faithfully

Carleton Edwards (Mr)
