Dear Miss Pitney,

Ref: APP/17/00593

Thank you for drawing my attention to the proposal for changes to no. 5, School Lane, Emsworth.

I am writing concerning the relocation of the bollard nearest to the property, to allow access to a designated parking space adjacent to the north wall of the property. I assume that the space would be east-west, with access from Bridgefoot Path.

The lower end of School Lane is narrow, all the adjacent properties have cars, and often there is congestion with visiting commercial or private vehicles. To enable vehicular access from School Lane into Bridgefoot Path when the designated parking space is unoccupied (which would be the case if the bollard was removed) would allow, even encourage, other vehicles to use it as an alternative to using the north section of Bridgefoot Path. This would be greatly to the detriment and inconvenience of residents.

School Lane is a cul-de-sac, and must remain so. This will probably best be achieved by repositioning the bollard a short distance east, or possibly east-north-east.

Yours Faithfully,
