95 Church Rd

Hayling Island
Hants

11-7-2017

Dear Sir

I am writing with concern about the proposed KIDHE that is hoped to be built on Hayling Island. I hear that the excess water from the site is to be diverted in to what is being called the stream at the back of Church Rd. There is no stream at the back of Church Rd. However there is a ditch dug many years ago by farmers to stop there fields flooding in winter. This ditch already fills to capacity in

winter & often floods in to
the top of Church Rd in very
wet weather. As a resident of
Church Rd I am concerned about
the inevitable flooding this will
cause to our gardens. I am also
sadden by the loss of another
green field. This time not even
for housing. If this store must
be built it should be built in
an already retail area. This
used to be a very pretty island
attracting holidays makers. Now it
has become one big housing estate
with shopping areas. This island
is being so destroyed.

yours sincerely
