Dear Daphney,

I am writing to appeal again regarding the proposal of 5 flats and 2 houses on the site of the old Co-op in Milton Road/Pyrford Close.

No consideration has been given to the residents of Pyrford Close by submitting this proposal of 5 flats and 2 houses. Our major concern remain the same, increased traffic through our residential close, which now include double decker buses!!!! Has anyone from the Council taken the time to monitor the sheer volume of traffic in this area?

Trying to reverse out of our drive during peak times of the day and then into Milton Road is a continuous nightmare.

Parking is a huge concern and problem and I would like to know in writing from you where you propose parents dropping their child to school park safely? Where do you propose customers using the shops to pick up a prescription, or get shopping park? To my mind neither of these major issues have been taken into consideration. So parents will just park illegally causing obstruction and chaos with no thought to us as residents. Customers who currently use the shops will get frustrated at not being able to park and do the same or decide to take their custom else where. So eventually the shops will close.

Havant County Council you have a duty to us as tax payers that the well being and safety should be uppermost in your planning by looking not just how you can squeeze in a few more flats but how to serve this community which is what we deserve.

We are still getting the Flower lorry parking either across our drive or opposite which I believe you were going to get the Highway Officer involved to investigate?

I am totally opposed to your proposal

Yours faithfully

Jayne Kimber
