

FAO case officer

I have attached photographs as listed below. These show view from outside rear garden, patio area and from inside my house. The black flue pipe is about where the dormer will be visible.

Regards Tim Bennett

Commenter Type: Complainant

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: I wish to object to this proposal on the grounds of it will be an invasion of my privacy. The bungalow is positioned further back on its plot than my house therefore from the front dormer window you will be able to look straight into the windows on the side of my house. At the rear again the dormer window and French doors will be able to look straight into my garden, there will be no where in the garden that cannot be seen.
Also given the construction of the foundations and given the heavy clay soil, would the increased weight of the building not be overloading them?
I have taken photographs and will send them separately.
