Dear Sir or Madam,

Please find attached retrospective planning application to retain the (part) boundary walls and associated outbuilding block built to shed to the rear. I had a visit from Mrs Ware, and she informed me that the above shed and boundary wall in part are subject to planning permission. When you do a site visit can you contact me so that I can be present, the problem being is that I work all day, every day as a bus driver, so I will need to get time off.

I have spoken to my immediate next door neighbour and I have suggested that I paint the wall on their side a cream colour, the same as I have painted my own and they said this is fine and that they do not have a problem with this.

Should I get planning consent, I would be looking to paint the outside walls with a brown or similar dark colour unless there is a colour of finish that you prefer. Also I was intending to put UPVC double glazed double doors in the opening, white in colour and clad the face of the shed in the garden area with similar to what I have used on the lower half of the house, cream in colour.

I have also raised the garden by approximately 150mm in front of the shed to make the whole garden level.

Your Sincerely

Mr Robert Green
