For the attention of Mr J Gargett.

Dear Sir

In response to your correspondence of 28th July 2016 regarding application for lopping old oak trees,

we oppose the application in its present form as we feel what is being proposed is far too radical i.e. removing

3m off one side and reducing the width by 3m is far too damaging.

The owner of this house has only moved to the above new build in the last couple of months fully aware of the beautiful

old oaks, knowing this WHY BUY THE PROPERTY? We purchased our property because of the oaks and we are very saddened

that someone wants to come along and pretty much destroy them.

When permission was given to build these houses we were assured by the council that the oaks would be

protected. In respect of structural damage the houses would have been built with the knowledge that there are

TPO's in place and to our knowledge these trees are perfectly healthy.

We would like to add it also gives us some privacy and greenery rather than having to look at a 30ft odd wall(side of house).

We have no objection to reducing height stated and possibly a meter for other measurements as long as this is undertaken

by a qualified registered tree surgeon and without causing irrevocable damage. Remember it takes a great many years to grow

trees of this size and too many are being destroyed in Hampshire, so please dont kill them.!

Yours faithfully

Stephanie Swan
