Why you think permission should
or should not be given

	
PO11 9JL	
APP/15/00919	
Land North of Station Road Hayling Island	
Mrs A Wright	
I do NOT think permission should be given because Hayling is so small. People who do not live on the Island apply for permission to build houses without any thought for the people who live on Hayling now. If the Council continue to allow developments on all our open spaces, life will become impossible for existing residents. There are very few employers on the Island, thus most people have to cross the bridge each morning and it takes very little to snarl up the traffic. People miss important appointments because there is no alternative route off the Island everyone has to use the same road. There is not even a ferry any more!!! The number of people living on this Island, I believe, is now in excess of 17000, surely that is sufficient for a place with no Hospital and only one Doctor's Surgery and few Dental Practices, no fully equipped Leisure Centre, no public swimming pool, and again one road between all of us and the mainland. Of course that does not allow for the large number of summer visitors who also access our Island and need to get off again. It is time to call a halt to new housing developments creating a further increase in population numbers.
