Dear Sirs

Further to my email of 29 September, which is copied below, I am now advising that we have gone ahead and planted replacement trees in order to discharge our planning condition.

We were advised not to plant an Acer (as previously notified) because our soil type is unsuitable so we have now planted the following:

1. Cercis Chinensis
    1. Size is 2.5 - 4m in 10 years
    2. Position - on corner of Wensley Gardens and New Brighton Road within the perimeter
2. Euonymous Alatas
    1. Size- 4m in 10 yeara
    2. Position - within the perimeter fence abutting New Brighton Road and on the corner adjacent to the drive of 93 New Brighton Road
3. Photinia Glabra Red Robin
    1. Size - 4m
    2. Position - within the perimeter fence adjacent to 93 New Brighton Road

We have also planted Copper Beech hedging plants along a new chestnut 'post and rail' fence to the front of the property in Wensley Gardens;we believe this will add further character to the site.

I hope that this is now sufficient for our planning condition to be discharged and I look forward to receiving confirmation of that from you.

Kind regards

Helen and Chris Turner
