RECEIVED

Dear David Eaves,

It is with horror and dismay that we read about a proposed planning application to build houses on Rook Farm.

Our roads on Hayling cannot take the extra traffic it would cause. Already people are missing important appointments when accidents occur on the only road off the Island. Imagine the chaos in the summer months, with traffic trying to get on and off the Island. The congestion is bad enough in the winter months already.

The Health Centre cannot cope with the numbers of sick residents at present, let alone a possible thousand more if the building goes ahead.

Wildlife would be severely impacted, including a herd of resident Roe Deer and around 300 Brent Geese in the winter months. Hayling Island needs some green spaces for our children to enjoy.

Please stop building on Hayling and save it from overdevelopment.

Yours Sincerely
