

Planning application reference number (if applicable)?: APP/23/00076 Additional information:

We wish to object to the above planning application.

The site lies within a Site of Special Scientific Interest (SSSI) and part of the National Landscape. There is no development allowed within a SSSI and if the Planning Committee approve such an application, it will be the first in the Country. Not a precedent to be proud of!

The trees in Tournerbury Woods are covered by TPO 446. Why have so many trees been removed without HBC taking enforcement action.

This retrospective application is seeking approval for an unauthorised use, structures with no planning permission. Why has Havant BC allowed this activity to be established in the full knowledge of its existence with political fundraising parties together with the attendance of our local MP being staged there?

The access that is being used, was only ever intended to provide access to Woods Cottage, never a venue where hundreds of people attend, many weekends of the year. The Owners of the farm have been put in an impossible position as the access goes through their farmyard; it is only by good fortune that no serious accidents have occurred.

In the floods that occurred in April 2024, the various parts of the site were substantially under water and parts of the site cut off. The site lies within severe flood zone 3. This puts people seriously at risk.

 who paid our local taxes, we are appalled to learn that despite the site being used for business purposes since 2013, the Owners have never paid any commercial rates.

Why ?
