

1. As with the previous application for a school this application has been put in just before Christmas when few of us have time to look at the implications for the neighbourhood.

2. Why is there such a hurry for a decision?

3. Again why were so few people given notice of the application. [REDACTED]

[REDACTED] we have not received a formal notice. Today I went to look for signs on lampposts. I found only two scrunpled upside down notices. Photos attached. As far as I know only one house in Grove Road has been officially notified. I have tried online to look through the Hampshire Independent to find a notice but have so far failed to find anything in this publication.

4. Building contractor: Does the Planning Department know whether LiveLink Technologies plan to develop the site themselves or whether they plan to try to sell the site on to a building contractor with 'planning permission'.

5. Apartments for sale?: Can anyone tell the neighbourhood whether the 19 apartments will be sold privately or whether they will be rented out.

6. Parking - The bollards which were recently installed without notice and have since been taken down must not be allowed to block the right of way which is the Billy Trail. If the bollards were part of a plan to isolate that end of the car park for this application, then this must not happen. It will cause accidents and chaos. In fact they did cause accidents and chaos.

7. Communication: The current owners, LiveLink Technologies, have many core values about respect for community and colleagues. Could they add communication with the local neighbourhood to their core values. With a bit more information about how they plan to use the change of use we could decide whether to support or object the application.

8. Resigned: Resigned to making no difference. As far as I can see it will make no difference whether I support or object.
