5 Statutory and Non Statutory Consultations

Not required

6 Community Involvement

Not required for a Certificate of Lawful Proposed Use or Development.

7 Planning Considerations

7.1 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:

(i) Whether the development would require planning permission

7.2 The proposal has been assessed against the 'permitted development' allowances in The Town and Country Planning (General Permitted Development) (England) Order 2015.

7.3 The development has been assessed against Schedule 2, Part 1, Classes B and C.

7.4 Class B is relevant for the proposed rear dormer, which under Class B1 meets the following tests:

(a) The property has not been granted permission to use the dwellinghouse as a dwellinghouse only by virtue of Class G, M, MA, N, P, PA or Q of Part 3 of this Schedule (changes of use);
(b) No part of the dwellinghouse would, as a result of the works, exceed the height of the highest part of the existing roof;
(c) No part of the dwellinghouse would, as a result of the works, extend beyond the plane of any existing roof slope which forms the principal elevation of the dwellinghouse and fronts a highway;
(d) The cubic content of the resulting roof space would not exceed the cubic content of the original roof space by more than 40 cubic metres.
(e) The proposal does not include:
  (i) the construction or provision of a veranda, balcony or raised platform, or
  (ii) the installation, alteration or replacement of a chimney, flue or soil and vent pipe
(f) The application site is not on article 2(3) land
(g) The dwellinghouse is not built under Part 20 of this Schedule (construction of new dwellinghouses) or
(h) The existing dwellinghouse has not been enlarged in reliance on the permission granted by Class AA (enlargement of a dwellinghouse by construction of additional storeys).

7.5 B2 The materials to be used are to match those used on the original dwellinghouse

Condition B.2(b) is satisfied as the eaves of the original roof will be maintained and reinstated as part of the proposed works

7.6 Class C is relevant for the proposed front rooflights, which under Class C1 meets the following tests:

(a) The property has not been granted permission to use the dwellinghouse as a dwellinghouse only by virtue of Class G, M, N, P, PA or Q of Part 3 of this Schedule (changes of use);
(b) The rooflights are stated as not protruding more than 0.15m beyond the plane of the slope of the original roof when measured from the perpendicular with the external surface of the original roof;
(c) No part of the alteration would be higher than the highest part of the original roof;
(d) (i) there is no installation, alteration or replacement of a chimney, flue or soil and vent pipe
  (ii) there would be no installation, alteration or replacement of solar photovoltaics or solar thermal equipment;
(e) The dwellinghouse is not built under Part 20 of this Schedule (construction of new dwellinghouses).

7.7 C2 conditions relate to side windows, and none are proposed.

7.8 A search of the planning history has not revealed conditions that restrict 'permitted development' rights, nor is the dwelling part of an Article 4 direction.

8 Conclusion

8.1 It is considered that there is sufficient evidence as detailed in the submitted documentation to prove that the addition of the proposed flat roof dormer to the rear roof slope and rooflights in the front roof slope are considered to be permitted development under the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended) and accordingly the Certificate of Lawful Development can be issued.
