Amended site plan as existing.pdf; Amended site plan as proposed.pdf;

Dear Rob,

Thank you for your email.

I have amended both the existing and the proposed block plan, as you will have seen when visiting the site, there is an existing drive forward of the side gate, which I did not show on either plan, but which is currently used for parking. I have shown the existing gravel parking area slightly extended on the proposed plan to give greater manoeuvrability, this area, like the existing will just be a thin layer of scalpings with gravel finish and will be a permeable surface that will conform to the Permitted Development Order.

The proposed cladding is a 'Hardie Plank Cladding' and the colour is to be 'timber bark', I can obtain a sample if this is required.

We are happy for the side dormer, that serves the proposed bathroom, to be conditions to have obscure glass and unopenable below 1.7m.

Kind regards,

Jane.
