

Acorn

Gardens &

Fencing

Dear Mr& Mrs Rodriguez

16th February 2026

Please find enclosed design for work as requested to retain character of Marine Walk

As the car port needs to be moved away from the front we are now in need with significant landscape buffer to offer and arrange screening.

This will allow us to have mitigate visual impact on Landscape and proposal.

1. In addition to previous proposal we are in need to add and considered winter height sufficient screening to soften visual impact to consider, and taken into account environmental species, and natural habitat
2. We are also in need to see completed car port for work to begin as in all design of the garden as this is main feature as addition to garden landscape
3. I will list plants, native trees, shrub, grasses and perennials and other climbers species to be considered at 50% minimum, and I suggest that most of the planting are to be evergreen and perennial.
4. This will be in line with HBC and Joint Chichester Harbour ANOB SPD
5. Evergreen Clematis - C. Montana to grown over buildings as a screen : fully or half hardy early Ranunculaceae
6. Large Cultivars –C bees Jubilee frost hardy
7. Hydrangea climbing-petiolearis or guercifocia
8. Ceanothus Impressus
9. Paracantha-golden Charmer
10. Oxalis
11. Mirtle
12. Euphorbia Mellifera (Honey Spurge)
13. Verbascum Ocympicum
14. Erenium Johnson Blue and Rosanne
15. Trachelospermum
16. Memoza tree
17. Acanthus Spinolus
18. Agapanthus back in black
19. Grasses- Phalaris Arundinacea
20. Fig brown Turkey
- 21.
- 22.
