

The Emsworth Residents Forum shares the concerns set out by Hampshire Highways in its letter of 10 February, regarding the intensification of use and the consequential impact on the existing highway network. It's by no means clear what specific parking provision currently exists for the gym on the site - or whether the proposed new use and associated car-parking will displace the car-parking provision currently used by gym-users. Access to and exit from the site is into the narrow neck of Warblington Road which will hopefully also be considered in a Transport Statement.
