

Dear Havant Planning,

I've been informed that the Planning Portal does not currently allow posting of comments for planning applications, and this email to planning.development@havant.gov.uk is the required method.

Please lodge the following comment in favour of the application **APP/26/00089**

 We understand that their 3-storey family home of  with it's extensive grounds, now far exceeds their accommodation needs and it is time to downsize. The proposed new build, sitting comfortably within the site, will provide them with a 'home for life' while releasing the existing property into the local housing stock.

Having reviewed the submitted plans, I see a well designed layout within a 2-storey property. To minimise impact, the height matches the adjoining properties and the elevations designed to respect any privacy issues that might be raised.

It is for the above reasons that I write in support of this application.

There has been a history of development and upgrades to neighbouring properties on the East side of Wittering Road. This application, the quality of proposed build and finishes, and it's orientation aligning to the building plots of these neighbouring properties, will sit well within the extent of previously approved works along the road."

Many thanks
