Planning Application Reference: APP/25/00823

Description: Installation of new extraction system

Location: Ensinger, Waterberry Drive, Brambles Farm Business Park, Waterlooville, PO7 7XX

The Ensinger Ltd document entitled 'Noise Impact Assessment Report Version P01' (dated 19th March 2026) has been reviewed.

I am satisfied that the report has considered appropriate guidance and the assessment methodology is compliant and findings reliable.

It is noted that no treatment is carried out at the Genesis Care Cancer Treatment building, and that open windows are not relied upon for ventilation. It is therefore agreed that the Genesis Care Cancer Treatment building is not an overly sensitive receptor.

I am satisfied that the report findings demonstrate that adverse impacts to the Genesis Care Cancer Treatment building, and other nearby office buildings, are not anticipated, subsequently the application should not be refused on noise grounds.

Environmental Health (pollution) has no objection to the proposals based on noise grounds.

Kind regards,

Craig Milligan

Environmental Health Officer
