Hi Jennie

Thanks for sending through the approval for conditions 7 and 8, I appreciate the quick turnaround.

As for condition 9, our intent is to stay within the original approved plans with regards to cladding being in Grey – this is an oversight on my part with the list I sent through (having been schooled on the difference between Anthracite and light Grey!). We also have no intentions of rendering over any existing brickwork, only to re-render the existing render to clean up the look of the building.

Please accept this as written confirmation for the use of light grey cladding and our intention to not render over existing brickwork.

Please let me know if you need anything further

Hi Glyn,

I have issued the approval for conditions 7 and 8. However, in discussing the materials for condition 9 with the original case officer there is some concern over the change from light grey cladding shown on the approved drawings to anthracite, particularly in combination with a relatively dark blue. I also wanted to check with you that the existing brickwork would be retained as this is not mentioned, or would this also be rendered?

Kind regards,

**Jennie Fox**
