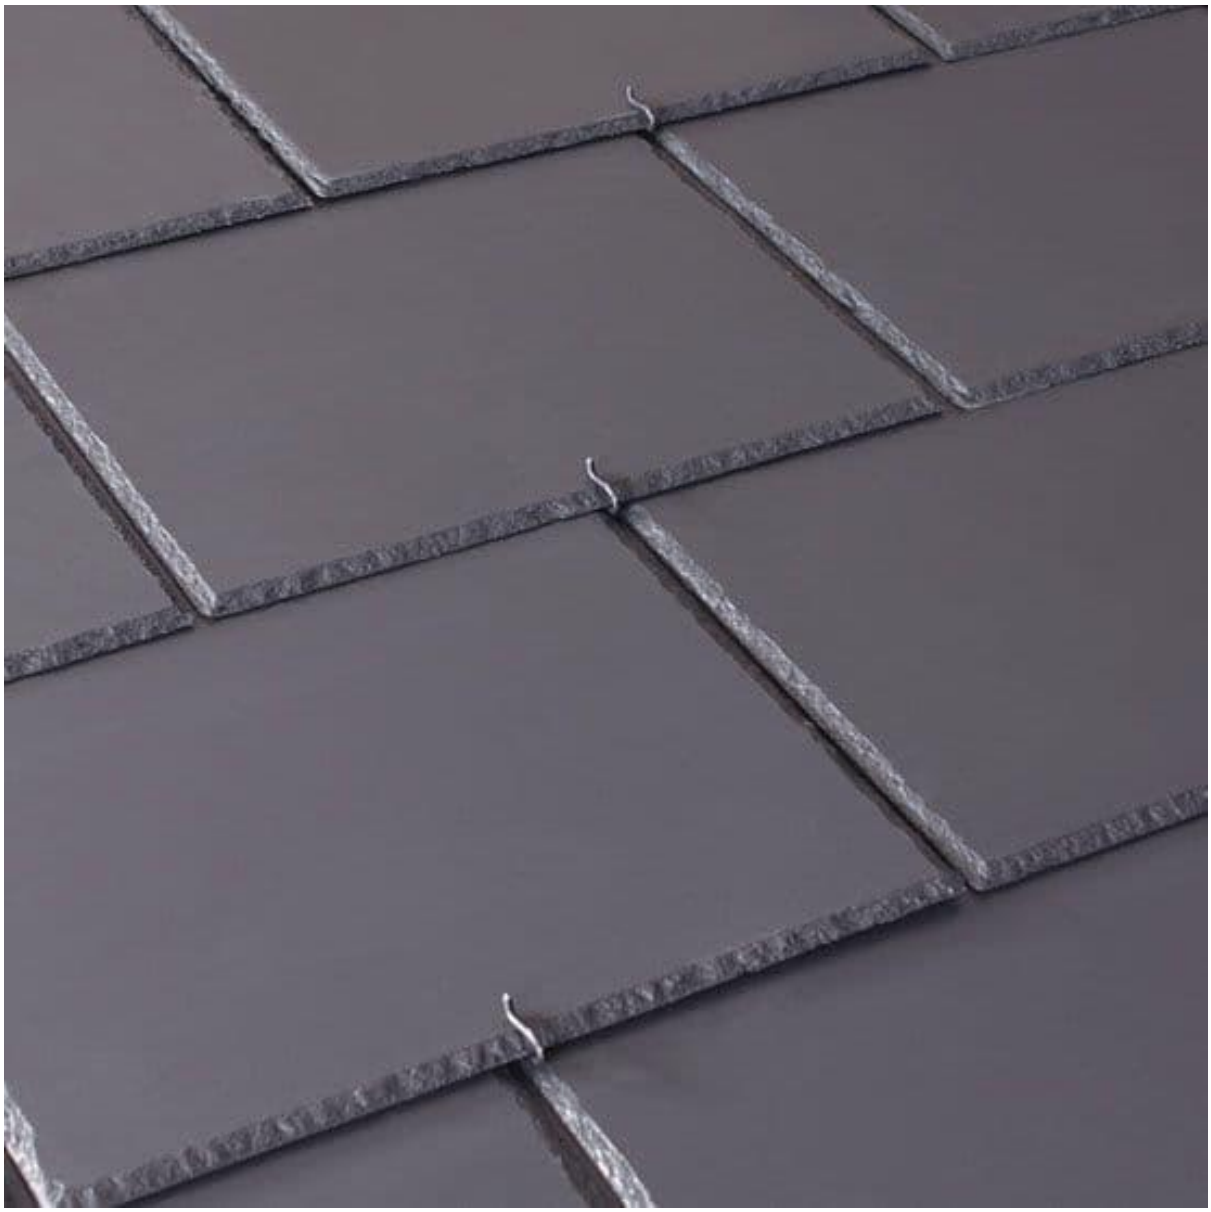
Materials Statement for 91 Havant Road Hayling Island

Roof

The existing roof is slate, This will be retained and the new extension will use slates which match as closely as possible to the existing slates such as the eternity example below



Walls

The existing rear elevation was originally a flat white render which has discoloured over time

The new extension walls will be a flat white render

Similar to the property below

Windows and Doors
The existing rear windows are a mix of poor quality upvc in a range of styles
These will be replaced with black composite windows to the new extension. As per the previous image

Existing Building
Please note the existing building other than the rear elevation will retain is existing materials
