Subject: Planning application APP/25/00978 - 14 Bridgefoot Path

Dear Selina

At the time that this application was submitted, there were no detailed plans, as I mentioned in my objection comment on 3 January 2026. At some point more recently, plans have been added to the portal, but there doesn't now appear to be the opportunity to comment on the plans.

My comments on this planning application are the same as my comments on APP/25/00976 which you may be taking into account.

While these two applications have less impact to light and outlook [redacted text], a very significant impact would remain to the light and outlook of the kitchen window [redacted text]. The flat roof of the proposed kitchen extension is indicated to be significantly higher than the existing wall between the properties thereby adding a material reduction in light and outlook [redacted text]. Furthermore the proposal contains a window to the full height of the extension that would look directly over the wall into the kitchen [redacted text]. We would therefore like to register our objection to these elements of the application.

Could you kindly confirm that my comments will be taken into account now that plans have been posted to the planning portal.

Many thanks
