NOTES

The survey grid has been related to OS National Grid (OSN15), presented at OS scale factor. Levels are related to OS datum (OSGM15). Grids and datum have been determined from the National GPS Network.

No assumptions should be made regarding the intersection of manholes. Drainage details have been obtained from surface inspection and should be verified if of critical importance.

Ordnance Survey mapping data supplied by client.

The position and height of adjacent buildings have been obtained using higher level reflectorless measurement and may not take account of single storey extensions or conservatories below the line of sight.

NOTES

The survey grid has been related to OS National Grid (OSTN15), presented at OS scale factor. Levels are related to OS datum (OSGM15). Grid and datum have been determined from the National GPS Network.

No assumptions should be made regarding the interconnection of manholes. Drainage details have been obtained from surface inspection and should be verified if of critical importance.

Ordnance Survey mapping data supplied by client.

The position and height of adjacent buildings have been obtained using higher level reflectorless measurement and may not take account of single storey extensions or conservatories below the line of sight.

Species / Dia / Spread (max) / Ht  
e.g. OK 10.6 / 8 / 15

NOTES

The survey grid has been related to OS National Grid (OSTN15), presented at OS scale factor. Levels are related to OS datum (OSGM15). Grids and datum have been determined from the National GPS Network.

No assumptions should be made regarding the intersection of manholes. Drainage details have been obtained from surface inspection and should be verified if of critical importance.

Ordnance Survey mapping data supplied by client

The position and height of adjacent buildings have been obtained using higher level reflectorless measurement and may not take account of single storey extensions or conservatories below the line of sight.

NOTES

The survey grid has been related to OS National Grid (OSTN15), presented at OS scale factor. Levels are related to OS datum (OSGM15). Grids and datum have been determined from the National GPS Network.

No assumptions should be made regarding the intersection of manholes. Drainage details have been obtained from surface inspection and should be verified if of critical importance.

Ordnance Survey mapping data supplied by client

The position and height of adjacent buildings have been obtained using higher level reflectorless measurement and may not take account of single storey extensions or conservatories below the line of sight.
