Good Afternoon Kayleigh

We live at (Redacted) and our garden backs onto the Goodwillies site, after looking at the plans (for quite some considerable amount of time) we have some question, as follows:-

1 It seems that house No 8 would back onto our garden behind our garage, just to clarify but currently the bordering fencing is the responsibility of the Goodwillies site and has been for many years, it is in good order at the moment but will the occupants of No 8 once it is completed have it written into their deeds that the boundary will be their responsibility?

2 The street scene shows cladding on the apartments and personally i tnink it looks cheap, dark and horrible, surely the builders have some responsibility to make these homes athestically pleasing to the tenants?

3 Currently there is alot of wildlife residing in the site, foxs, numerous bird species, etc with the development across the road at Berewood already underway what is being done to protect our wildlife in the area?

4 There is alot of Asbestos on the site, when it is removed we would like to be informed and any dust residue falling onto our property to be quickly cleaned up by the developers.

5 Once the development is completed how will the residents living there be able to access the London Road? Will there be a junction or roundabout with Lights put on the London Road?

6 Is there anything left on the site of the old windmill? If so wouldnt it be nice to conserve it for historical purposes.

Thank you

Kind Regards
