

Good Afternoon Lesley,

I hope you are well.

You will see that Paul Basham Associates have today issued a modestly revised version of the TN which incorporates an updated plan from Ridge at Appendix B. This now incorporates the visibility to the tangent from the footpath as well as to the 43m distance.

As Paul Basham Associates have confirmed, the scheme remains the same as previously submitted.

I thought it would be beneficial to send across to you under separate cover so this can be uploaded onto Havant's system.

If you have any queries, please do not hesitate to contact me.

Kind Regards

Harriet Lobacz MRTPI
