The Planning Development
Havant Borough Council

From:-

Dear Sir

Re Planning Inquiry..APP/21/01434
Rook Farm..

I write to inform you that I am totally against the building of 300 hundred new homes on this Island on the grounds following:-

The extra stress and strain put on an already over whelmed :-

Schools, Doctors, Water and Sewage. Are all operating at there limits.

The existing Single road Access which is highly dependant on the high level traffic volume which currently exists, is now performing at its maximum limits.

It is beyond comprehension that any consideration is being given to allowing this proposed development to go ahead.

I have experienced many occasions of late where the high volume of traffic taken myself up to an hour to get off the island.

I hope the Council members will accept my request and refuse this development in it entirety ...
