[redacted] [redacted]

Application - APP / 26 / 00310

Today, 09:46

Dear Sir / Madam,

Re cutting down dangerous Lime Tree

Site : 19a, garden Close
Hayling Island. PO11 9AD

Proposal - cut 2m re TPO 0902

I have a problem with this application.

This massive tree [redacted] - whilst physically in the grounds of 19a

When this Lime tree was planted in the 19th century it was in the large grounds of a Vicarage built in 1865. It appears clearly on late 19th century photographs.

Whilst it survived the 1987 Storm - [redacted] - I don't believe it would survive future storms. I feel that a full SAFETY inspection should be carried out.
We would like to see the Tree removed and 2m trim is totally inadequate .

Apart from anything else, if it came down in a storm with an easterly gale it would crash [redacted] We live in fear whenever there are strong winds.

Dear Janey Garett,

This morning I had a very useful conversation with your colleague [redacted]

That said she didn't really appear to take on board that the email address provided on the back of your letter of 20th May for respondents to send their comments was invalid!

I attach my submission which was returned to me.

[redacted] did say it should be possible to talk to you / arrange you to examine the Lime Tree which is the subject of this Planning Application - to trim this monster tree...

Yours faithfully,

[redacted]
