Notes for Contractor

These drawings are for approval purposes and onsite guidance. Materials and products should not be ordered based on scaling from drawings as errors may occur along existing building lines. All measurements and supporting elements are to be checked on site. New walls to be built to aligned with existing walls or openings as shown on plans, this should take precedence over dimensions shown.

Foundation depth is assumed to be 1m, however, this has to be confirm by the Building Control Officer once excavated. Depths could increase.

Contractors to satisfy themselves of drainage, levels, runs and locations, as a survey may not have been undertaken.

Refer to Your Home Plans if any differences are found that could affect structural calculations or design.
