How you can see on the attachment foto, the actual porch will be no changes , the changes will be only on the window, a bit longer, and the roof. We want to do longer on 1200m, and make a bit hight to do equal on the both sides, also column on the end, the foundation will be the same for column like on the porch. Sorry for mistakes, and hope you understand what I mean.
Please let me know if you need more information.
