Matt Smith and his wife Pip occupy 310 acres on the edge of Bodmin Moor, farming over 1,000 ewes & 250 breeding hinds equating to approximately 600 red deer at any one time.

"We were looking for a long-lasting fence, when we came across McVeigh Parker and the steel post system. Aesthetically it was something I was unsure of at first, but like it or not, you can't deny it makes perfect business sense. I didn't want to fence this farm four times in my lifetime or leave it in a state of disrepair for the next generation."

- Matt Smith
