Agility Trail 5

NRO864

*or equal and approved

The Agility Trail 5 is a challenge that all 6-12 year olds will want to take on. The variation in responsive balancing activities will make children come back again and again. The combination of overhead and tight rope walks offers great play challenges. Balancing across the swaying ropes, rolling logs and responsive horizontal ropes of the Agility Trail 5 stimulates balance and proprioception which are fundamental in confidently managing the body in its surroundings. This is important for instance when navigating street traffic safely. But it also plays an important role for children's self confidence. The multiple places where children have to take turns and negotiate to cross one another train important social-emotional skills that are basic to the ability to form friendship and relate to peers. All in all, so much more than play.

KOMPAN

Item no. NRO864-1001	
General Product Information	
Dimensions LxWxH	1129x188x210 cm
Age group	6+
Play capacity (users)	15
Colour options	

Agility Trail 5

NRO864

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

Nets and ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope which leads to good wear resistance.

The teardrop handle has been designed in such a way that it can be used as a handle and a footrest. The shape and diameter of the handle is optimal for kids.

Item no. NRO864-1001	
Installation Information	
Max. fall height	60 cm
Safety surfacing area	49.0 m²
Total installation time	15.8 hours
Excavation volume	1.53 m³
Concrete volume	0.88 m³
Footing depth (standard)	100 cm
Shipment weight	1,013 kg
Anchoring options	In-ground
Warranty Information	
Robinia wood	15 years
Stainless steel components	Lifetime
Stainless steel components	Lifetime
Ropes & nets	10 years
Spare parts guaranteed	10 years

Climbing panel of 19mm CircularHDPE. CircularHDPE is a highly durable, eco-friendly material, which is not only recyclable after use, but is also made of >95% recycled post-consumer material from e.g., food packing waste in both core and colourful outer layer.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

Agility Trail 5

NRO864

Climbing wall
Physical: balancing and climbing the climbing wall develops cross coordination, which supports cross-central perception, necessary for other skills such as reading.

Balance ropes
Physical: holding onto the swaying upper rope when balancing on the swaying lower rope develops upper body strength, as well as balance as well as the trunk muscles. These abilities are fundamental for being able to sit still on a chair. **Social-Emotional:** cooperating with friends or walking over the swaying ropes is a fun cooperation task that takes teamwork and tolerance.

Teardrop handles
Physical: hanging with the arms and swinging the body from one handle to the next develops upper body muscles and cross coordination. **Social-Emotional:** passing from one handle to another trains turn-taking skills and consideration.

Dynamic beam
Physical: the child practices balance intensely when staying on the spinning beam. This is a challenging and thrilling activity and develops the child's risk-taking skills in a safe environment. **Social-Emotional:** cooperation and consideration when spinning together with others.

Balance beam
Physical: trains the sense of balance, fundamental for all other motor skills that makes it possible to navigate the world confidently and securely. **Social-Emotional:** the beam is a fun place to meet friends when crossing each other on the beam. Room for a seated rest and exchange.

Sustainability Data

NRO864

Cradle to Gate A1-A3	Total CO_2 emission	CO_2e/kg	Recycled material
	kg CO_2e	kg CO_2e/kg	%
NRO864-1001	360.30	0.50	3.59

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enables comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3)

Independent review certificate

Kompan A/S
C. F. Tietgens Blvd. 32C, 5220 Odense SØ

Robinia Verified hereby attests that the CO2e-calculations, including materials, processing, waste and transport, done by Kompan for "Nature Play", meet the requirements set by the listed standard.

Kompan A/S uses a selection of EPDs and emission factors from the Life Cycle Assessment database Ecoinvent 3.11. These values are reported as kg CO2e, with all other impact categories excluded in line with the scope of ISO 14067:2018. Biogenic carbon is reported separately. Calculations are based on 2024 data for the mix of electricity used during manufacturing. The presented emissions fall under GHG Protocol scope 3 emissions. Scope 1 and 2 are not presented. Scope 3 emissions include emission sources in the upstream value chain of a company. Downstream emissions are excluded in this analysis.

Method: ISO 14067:2018 using GHG protocol guidance documents, reported as kg CO2e.

Object

The verification has been done on the one pager "NRO4861-0001" version 27-10-2025. The supporting documentation "NOMPAN data_updated emissions factors_2025_10" and "Emissions factors, EPD's and ecoinvent 3.11_2025" was also reviewed and approved.

Declaration

The verification has been completed as a critical review with a limited assurance. I hereby confirm that nothing has come to our attention to suggest that the calculations of the GHG emissions for the above mentioned item is not in compliance following method of the CO2e-calculation, the requirements of ISO 14067:2018, and 14071:2024, in the above referenced documentation.

Note: This verification only covers calculation elements according to method described in ISO 14067:2018 and may not be seen as a Life Cycle Assessment according to ISO 14067:2018.
