

Good afternoon Ms. Donophy,

Thank you for consulting Hampshire County Council's Minerals and Waste Policy Team on the below application.

Having reviewed the submitted CEMP and the Baynham Meikle letter in response to Condition 24, we are unable to recommend Condition 24 for discharge. Neither the CEMP or the engineer's letter detail the method which will be employed by the development for the segregation and assessment of minerals or how the development proposes to approach the beneficial use of minerals. Additionally, there is no commitment to the recording of mineral tonnages or reporting those tonnages to the Minerals and Waste Planning Authority.

In order to discharge the requirements of Condition 24, we require further information on this topic on how the development will recover viable minerals and put them to beneficial use.

We can provide examples of acceptable wording if requested by the applicant.

If you have any questions, please don't hesitate to contact us.

Kind regards

Andy Denton *BSc. (Hons) MSc. AssocRTPI*
