Planning Application Reference: APP/26/00422

Description: Request to discharge condition 7, 8, 11 and 13 (received 10.06.26)

Location: Land north of Furniss Way, Hayling Island

The Four-One-Four document entitled 'Construction Environmental Management Plan (CEMP) | Revision B' (dated July 2026) has been reviewed.

I am satisfied that the plan meets requirements of the condition and that the proposed dust and noise mitigation measures are appropriate given the scale of development and separation distance to receptors.

The plan includes means for the public to raise complaints if necessary and commits to prompt investigation and implementation of remedial measures.

Environmental Health (pollution) recommends the submitted information is sufficient to discharge the condition.

Kind regards,

Craig Milligan
