KOMPAN

Agility Trail 5

NRO864

Item no. NRO864-1001	
General Product Information	
Dimensions LxWxH	1129x188x210 cm
Age group	6+
Play capacity (users)	15
Colour options	 

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

Nets and ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope which leads to good wear resistance.

The handrail handle has been designed in such a way that it can be used as a handle and a footrest. The shape and diameter of the handle is optimal for kids.

Item no. NROB64-1001	
Installation Information	
Max. fall height	60 cm
Safety surfacing area	49.0 m²
Total installation time	15.8 hours
Excavation volume	1.53 m³
Concrete volume	0.88 m³
Footing depth (standard)	100 cm
Shipment weight	1,013 kg

Warranty information	
Robinia wood	15 years
Stainless steel components	Lifetime
Stainless steel components	Lifetime
Ropes & nets	10 years
Spare parts guaranteed	10 years

The Agility Trail 5 is a challenge that all 6-12 year olds will want to take on. The variation in responsive balancing activities will make children come back again and again. The combination of overhead and light rope walks offers great play challenges. Balancing across the swinging ropes, rolling logs and responsive horizontal ropes of the Agility Trail 5 stimulates

balance and proprioception which are fundamental in confidently managing the body in its surroundings. This is important for instance when navigating street traffic safely. But it also plays an important role for children's self-confidence. The multiple places where children have to take turns and negotiate to cross one another train important social-

emotional skills that are basic to the ability to form friendships and relate to peers. All in all, so much more than play!

Climbing panel of 8mm CircularHDPE. CircularHDPE is a highly durable, eco-friendly material, which is not only recyclable after use, but is also made of 100% recycled post-consumer material from e.g. food packing waste in both core and colourful outer layer.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden colour of the wood.

Climbing wall
Physical balancing and climbing the climbing wall develops cross coordination, which supports cross-modal perception, necessary for other skills such as reading.

Twisting handles
Physical twisting with the arms and swinging the body from one handle to the next develops upper body muscles and core strength. Twisting and swinging also offers children a great challenge when climbing through teams turning skills and coordination.

Dynamic beam
Physical to avoid practices balance horizontally when playing on the spinning beam. This is challenging and training activity and can be used for training and for fun. The beam can be used for training and for fun. The beam can be used for training and for fun.

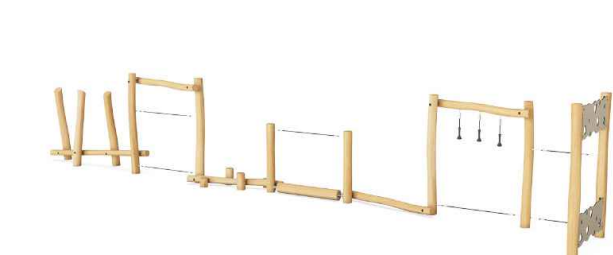

Balance ropes
Physical holding onto the swinging upper rope makes excellent training of the sense of balance as well as the hand muscles. These activities are fundamental for playing and for all on a chair. **Basic knowledge** cooperating with friends or walking over the swinging ropes in a team cooperation task that takes teamwork and tolerance.

Sustainability Data

NRO864

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled material
	kg CO ₂ e	kg CO ₂ e/kg	%
NRO864-1001	360.30	0.50	3.59

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies environmental information on the life cycle of a product and enables comparison between products fulfilling the same function (EN ISO 20503). This follows the structure and applies a Life Cycle Assessment approach to the entire Product Stage from raw material through manufacturing (A1-A3).
