

Trees removed from elevation at this stage to see the full fence.

At a point 1.2 metres behind the tbuilding/office, the fence line will step 1.5 metres into the rear garden. This arrangement will minimise disturbance to the mature trees located just inside the boundary along most of the street-facing frontage. The trees will continue to be maintained by the owners of 59 Longwood Avenue.

The fence line will start here where there is an existing gate

Bush es and small trees to be removed
