Description

The proposed pipeline will connect the proposed reservoir at Havant Thicket, which forms a separate planning application. The pipeline route extends from the Portsmouth Water pumping station at Bedhampton, northwards through the town of Havant, stopping at the reservoir. Most of the pipeline corridor is characterised by low-value road, hardstanding and amenity grassland, or poor semi-improved grassland typical of an urban setting. The pipeline corridor runs north along the Hermitage Stream before turning north-east and broadly following the Riders Lane Stream towards the reservoir site.

Description of the Proposal

Please provide a description of the approved development as shown on the decision letter

Hybrid application seeking:

- 1) Full permission for development of new pipelines to transfer water from Bedhampton Springs to fill the reservoir in the winter and draw it off to treat and supply when needed in the summer, comprising: construction of two predominantly underground pipes in tunnels linking the reservoir with the existing pumping station at Bedhampton with associated infrastructure including: emergency drawdown discharge structure at Hermitage Stream; construction of eight access shafts; washout and air valve chambers (typically below ground), new plant at Bedhampton Pumping Station, modifications to Bedhampton 2 operational building and permanent diversion of Footpath 34 at Bedhampton Pumping Station.
- 2) Outline application for an associated underground cross-connection chamber and above ground kiosk at the reservoir site with vehicular accesses for maintenance; and upgrades to existing culverts close to shafts five, six and eight to manage flood risk (amended description 6th March 2025). An Environmental Statement has been submitted with the application under the Town and Country Planning (Environmental Impact Assessment) Regulations 2017.
