

Hello,

We live in [REDACTED] Planning Application
APP/26/00324.

The developers have submitted evidence regarding bats, stating that Bechstein's bats are found on the Horndean Road side of the proposed development area. However, we have sighted bats in the field bordered by Eastleigh Road and Southleigh Road. This needs investigation as we previously had colonies of Bechstein's bats near us, which are protected.

As the consultation is due to close, could you give this matter urgent attention and assure me that the planning team are aware of this message.

Kind regards,

[REDACTED]
