

Good afternoon,

We have been made aware of planning application APP/26/00332, regarding 90 dwellings, part of which would be adjacent to the 5th hole of Waterloooville Golf Club. I believe Stonebond have revised the design, and they will install protective netting, which should mitigate any safety risks to residents. It would be good if they can clarify that if a ball strike assessment has been done and that if they can confirm they will be taking the ownership and upkeep of the netting?

Kind regards,

David
