

I wish to object in the strongest possible terms regarding the application to turn No.1 Ferndale, Waterloooville into an HMO. Property values will plummet, crime rates will soar and women will be scared to go out.

There is already concern regarding access to Ferndale from the Hulbert Road. The potential of 9, or more, cars using and parking on that already dangerous corner is a recipe for disaster.

The previous conversion some 20 years ago when the council turned down the application to turn the property into flats which was turned down by you and granted by Bristol who didn't know the area has resulted in a slum. Bins all over the pavement all week. Unidentifiable fluid running down the drive, garden so neglected that massive brambles cover the pavement and are difficult to walk past safely, undesirables prowling around.

A further conversion could make the problems much worse.

I hope the council in its wisdom will reject this application.

Yours sincerely,
