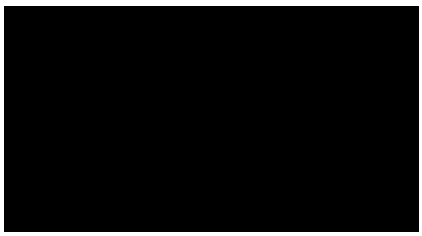
Dear Mr Jordan

The above proposal to develop land on the Oak Park site is fully supported with caveats-

Parking on the site is increased to a minimum 60 spaces to enable staff, residents and guests to park.

Construction access should be through River Way at present blocked with an earth mound, sole access for works traffic from Crosslands drive.

A project management plan with dates and a poc for the manager in charge of the development be made to all residents in the local area,


Your sincerely
