

I was dismayed to read that the proposed new reservoir site will include evening activities which will be detrimental not only to the wildlife, but also the local residents. I fear this idea will be an attraction for anti social behaviour and will damage the environment. The area needs to be secure at night not open to dubious activities.

The floating pontoon sounds a strange site for a visitor's centre and I understand the bird hide is only for educational purposes and not open to the public. This should be open to all to enhance the visitors' experience and encourage a pride in the area.

Southern Water have a great opportunity to embrace the local community, not put uncertainty into what could happen to a beautiful area. Essentially it should be an area to enjoy nature and be closer to nature instead it sounds as though it will become a noisy night attraction. Please keep it as a reserve to be enjoyed during the day for all.

I would like to register my objections to night activities for the above reasons.
