

Our Parish council has brought to our attention the above planning application, to which they have responded.

On reading their response please accept this email in support of the Parish Councils objection to the application.

Specifically, but not limited to, I am concerned that the environmental credentials of the initial proposal have been undermined by the material changes being proposed for the visitors' centres build and use.

This feels very much like a repeat of the approach used previously when seeking residents approval for the reservoir as being supplied by the local springs, only for proposal to be changed to handle treated waste water. Say one thing, but then do another.
